Mr. T. Nelson
Systems Consultant
Box 1546
Poughkeepsie, N. Y. 12603

Dear Mr. Nelson;

Thank you for your inquiry regarding our Super Speed CADM Rotary Collator.

The CADM Collator is built so that it can be used by one person or as many as six people at one time. Collating can be done for long periods of time productively because the operators are sitting down and not getting tired, as they collate. When the unit is not in operation, it can be easily wheeled to one corner of your plant so as not to take up extra room.

For your convenience, we are enclosing literature so that you can see its many fine features, among them the variable speed control, self-lubricating bearings and multiple foot control so that each girl can stop the machine instantly whenever it becomes necessary.

Should you have any further questions on this unit, Mr. Nelson, please feel free to contact us or your Authorized Super Speed Dealer.

Very truly yours,

SUPER SPEED INC.
